DETAILED ACTION

Response to Amendment

Claims 2-3, 17, 22, and 24-25 have been cancelled and the Examiner has entered new claims 26-37 for consideration.

1. The Applicant's amendment filed September 19, 2002 has been received, and the Examiner has reviewed *amended* independent **claims 1, 11, 16**, as well as *new claim 34*. Please see the enclosed rejection regarding the above-mentioned claims.

Response to Arguments

2. Applicant's arguments with respect to claims 1-11, 13-16, 18-21, and 26-37 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claims 1-11, 13-16, 18-21, and 26-37 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

Claims 1, 11, 16, and 34 all contain newly added subject matter pertaining to the “interface operably coupled to the digital engine,” the “interface associated with a communication network,” a “low-power RF communication module operably coupled to a processor module,” and a “processor module coupled to the communication module.” None of the claimed interface type devices are adequately described in the specification as required. It is known in the art that there are various content switch, or content enabling devices which vary greatly depending on the application for which they are used. In this case, the Applicant provides no description of any such enabler or interface that facilitates the transformation of the digital audio data stored in the digital engine into a wireless signal for consumption by a mobile user. The Applicant suggests such a content enabler or content switch type device in their amended claim language, but an adequate description in the specification is absent.

Claims 1-10, 13-15, 18-21, and 26-33, and 35-37 depend from claims 1, 11, 16, and 34 and are therefore rejected on the same grounds.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period

Art Unit: 2684

will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
